

What is a Bowl Show?

A Bowl Show is a mini fish show.

Each month at our regular meeting there will be three categories (species or types of organisms) in which each member can enter as many fish as they want.

A "guest" judge (not the bowl show chairperson) will examine each entry for size, color, general health, overall appearance, etc., to determine first, second, and third place in each category.

In addition to receiving an award for that month's show, first place is awarded 25 points, second place 15 points, and third place 10 points. Anyone that does not place in a category is awarded 5 points.

At the end of the contest year (August – June), the members who have accumulated the most points will be presented a first, second, and third place certificate for that year.

This is an excellent opportunity to show fellow members your prized fish!!
